

TERM-seal™ TERMITE-PRO

Professional Termite Baiting System

For the monitoring and eradication of termites

TERM-seal™ Termite-Pro Professional Termite Baiting System is an easy to install and maintain in-ground baiting system for the detection and elimination of termites.

Considered to be one of the most highly effective and environmentally responsible methods available and, due to its low toxicity, is safe for your customers and their pets. 100% Australian made and Australian owned, the TERM-seal™ Termite-Pro Professional Termite Baiting System was researched and developed for Australian conditions by TERMSEAL's resident entomologist who specialises in termite proofing and control systems.

How does it work?

TERM-seal™ Termite-Pro In-Ground Bait Stations are designed to attract termites away from the home or building and concentrate their feeding inside the bait station. Multiple in-ground bait stations are placed around the structure at 3~5 metre intervals as well as sites where the termites are likely to be foraging.

Each station contains highly palatable TERM-seal™ Termite-Pro Bait Wood in conjunction with the cellulose TERM-seal™ Termite-Pro CONVERGE™ Termite Activity Accelerant. This accelerant is non-toxic to humans or pets.

When termites are found to have entered the bait stations, the TERM-seal™ Termite-Pro ABIDE™ Termite Bait is added. The bait's active ingredient is Chlorfluazuron, an insect growth regulator which inhibits the termite's ability to grow its exoskeleton.

Worker termites ingest the TERM-seal™ Termite-Pro ABIDE™ Termite Bait, take it back to the colony and the elimination process is started.

What components make up the System?

TERM-seal™ Termite-Pro In-Ground Bait Station: a durable UV stable station with a non-slip lid. Measuring 200mm deep and a diameter of 107mm. The lid measures 165mm.

TERM-seal™ Termite-Pro Bait Wood: made from

Eucalyptus Regnans or Mountain Ash. TERM-seal™ Termite-Pro CONVERGE™ Termite Activity Accelerant: non-toxic to humans and pets. Has been specially formulated and tested with 100% activity results from 102 colonies in the due diligence trials conducted in Queensland and New South Wales. Species encountered in the trials were; *Coptotermes acinaciformis*, *Coptotermes frenchi*, *Coptotermes lacteus* and *Schedorhinotermes intermedius*.

TERM-seal™ Termite-Pro ABIDE™ Termite Bait: An insect development inhibitor type insecticide for use as part of the TERM-seal™ Termite-Pro Professional Termite Baiting System.

How is Termite-Pro Professional Termite Baiting System SOLD?

As separate components:

- **TERM-seal™ Termite-Pro In-Ground Bait Station**
Singularly or a pack of 10
- **TERM-seal™ Termite-Pro In-Ground Bait Station**
Complete: includes 2 x TERM-seal™ Termite-Pro Bait Wood blocks and 1x 50g bag of TERM-seal™ Termite-Pro CONVERGE™ Termite Activity Accelerant, singularly or a box of 10.
- **TERM-seal™ Termite-Pro Bait Wood**
Box of 20 blocks
- **TERM-seal™ Termite-Pro CONVERGE™ Termite Activity Accelerant**
50g bag, 20 x 50g bags or 1kg bag
- **TERM-seal™ Termite-Pro ABIDE™ Termite Bait**
1 x 100g bag, 20 x 100g bags, 1kg bag or 3kg bucket.

Where is it SOLD?

The TERM-seal™ Termite-Pro Professional Termite Baiting System can be purchased directly from TERMSEAL AUSTRALIA.
