

TERM-seal™

# PENETRATION COLLAR

Penetration Collars

**Providing a termite and moisture proof seal where concrete slabs have been penetrated by services**

TERM-seal™ Penetration Collars provide a termite and moisture proof seal where concrete slabs have been penetrated to accommodate services. Available to fit diameters 40mm, 50mm, 65mm, 80mm and 100mm pipes, TERM-seal™ Penetration Collars are installed in conjunction with TERM-seal™ Sealant Active to prevent concealed access for termites and creates a waterproof gasket.

Where a rigid collar is not able to be used due to slab and/or construction design, we have developed the PRM soft annular collar that meet and exceed the Australian Standard 3660.1 – 2014. Available in 40mm electrical, 40mm water, 50mm, 65mm, 80mm and 100mm sizes.

In some instances a concreter will pour the slab without any termite protection to the service penetrations, we have a solution for these problem jobs also – contact your TERMSEAL REPRESENTATIVE.
