

TERM-seal™

URA-FEN MAJOR

Termite Barrier Expansion Foam

Termite resistant and waterproofing barrier for use in building situations

TERM-seal™ Ura-Fen Major is a two component polyurethane settable foam containing 0.2% Bifenthrin as active constituent when cured. The foam comes together by the mixing of polyol and isocyanate components that undergo an exothermic reaction to create a settable, termite resistant and waterproof barrier. It is specially engineered for use in building situations to fill gaps, fissures and cavities. When dispensed, the foam is purple/blue in colour.

TERM-seal™ Ura-Fen Major is used in conjunction with TERM-seal™ PRM Active 110mm brick cord strip and TERM-seal™ Multi-Purpose Active Coating to create a premium perimeter barrier system.

Both applicator guns are available from TERMSEAL AUSTRALIA.

PRODUCT OVERVIEW

Available in 300ml and 750ml cartridge set Part A & Part B.
